KING OF DATA

REF. 2201SP1501

SOFTWARE ENGINEER OFFER

CONTEXT

KING OF DATA is an International Software and computing services Company based in Europe and Canada. We currently have open positions both for Madrid and Barcelona. (Desirable Madrid).

Are you thinking of next steps in your career path? You deserve a company that really cares about its talent. Our client, is looking for a Software Engineer to join our European Production Support team.

The ideal candidate will prefer the excitement of shaping the technology evolution of a leading global company over following the beaten path, and regard highly qualified colleagues not as competition but as a learning and development opportunity.

This Group is one of the most trusted insurance and asset management companies in the world. Caring for our employees, their ambitions, dreams and challenges, is what makes us a unique employer. Together we can build an environment where everyone feels empowered and has the confidence to explore, to grow and to shape a better future for our customers and the world around us. Join us. Let's care for tomorrow. Our client really believes in a diverse and inclusive workforce and are proud to be an equal opportunity employer. We encourage you to bring your whole self to work, no matter where you are from, what you look like, who you love or what you believe in. At the core of the Group's strength lies digitalization and its promise of growth opportunities through a 'digital by default' strategy. The department in charge of this project is the principal driver behind transforming the group into a digital group.

OBJECTIVES

As a Software Engineer, you will:
- Deliver technical solutions for the business, as requested by end users of the product across countries in the European region
- Be responsible for monitoring and ensuring the health of applications, as well as managing incident resolution for them
- Handle data related activities (uploads, extractions, reports …) as required by the business
- Collaborate and interact effectively with other application management teams worldwid
