JUNIOR PROGRAMMER (MVC Razor & .Net) (IT & Broadcast Data), in Madrid (Spain)

We are searching for a Junior BDF Coordinator to work in the IT & Broadcast Data department to assist in the BDF system administration, tests, maintenance and operation for a major event, working for a leading multinational company leader in the broadcasting of large-scale events.

TASKS & RESPONSIBILITIES

- Develop sport results templates for the visualization engine of the BDF system, performed in the .NET framework using MVC Razor technology for transforming XML messages.
- During the event, it is also expected that the candidate performs TV channel supervision, monitoring all the data needed from each BDF source for an adequate system performance.

REQUIREMENTS

- **Education:** Telecom, IT Engineering or related university degree required
- **Experience:** .NET development background, MVC (Razor) experience is much appreciated, as well as Web Development knowledge (X/HTML, CSS, javascript). It is also important to provide Software and Data Testing experience and Windows Server environment background.
- **Technical skills:** SQL and Networking abilities (VLAN understanding and routing, intermediate queries and database experience) are valuable.
- **Languages:** Fluent/Bilingual English (corporate language) is required.
- **Personal & Soft skills:** Good communicator (to interface with other departments, vendors and clients). Excellent Project Management skills, adaptable to multicultural environments. Detailed, precise and methodic.

WE OFFER

- **About the company & Career plan:** Join a multinational company, leader in the Broadcasting Services. Great place to work, international environment.
- **Salary & Conditions:** 1 year Temporary contract (including international period)=> Start date will be 1st of September. Attractive salary package.
- **Location:** Even when the position is initially based in Madrid (Spain), the candidate must be available to travel to the host city of the event during long periods of time (e.g. 6 months)
