

PRODUCT ANALYST

Do you enjoy learning and staying updated with the latest news in languages, platforms and development environments? Are you passionate about programming?

This job is for you!

LXA is a dynamic consulting company based in the heart of Nice Sophia Antipolis, with consultants from 15 different countries, who are working for the major economic actors in the area.

With participative local management, we are committed to keeping a close relationship with our consultants all along our common path.

Our areas of activity concern all the new technologies of IT and project management among others.

As our company is in full expansion in 2016, we decided to reinforce our team with new consultants.

Are you ready to become one?

About the job:

Design and test functionality for the development of new - and enhancement of existing - software solutions.

Main responsibilities

- Analyse business requirements submitted by Product Management.
- Review change requests.
- Size specification and testing phases.
- Elaborate functional specifications.
- Deliver test plans and test scenarios.
- Interface with relevant departments to identify interaction with other packages and assure functional compatibility.
- Carry out the functional walk-through of the product with the Development team
- Test product in order to ensure compliance of the delivered functionality and system integrity, and perform functional sign off.
- Ensure production integrity by validating and prioritizing reported problems.
- Interface and communicate with Product Management.
- Interface with customer during functional specification, testing and initial implementation phases as necessary.

Skills and requirements:

- Master Degree in Computer Science or related technical field with a first professional experience, you have good IT knowledge.
- UML/Rose experience is needed and Graphical User Interface design is appreciated.
- As part of international teams, you will be communicating in English.
- You are flexible, thorough and proactive as well as having analytical skills and technical expertise
